Introduction

Volume II of the Metropolitan Transportation Commission's (MTC) 2027 Transportation Improvement Program (TIP) contains the complete list of projects included in the 2027 TIP, as well as supporting information for grouped project listings

The 2027 TIP includes 407 projects with $13.1 billion in funds programmed during the four-year TIP period, federal fiscal year (FY) 2027 through FY 2030. Twenty-seven projects are new to the 2027 TIP, with the vast majority of projects carried forward from the 2025 TIP.

Volume II also includes the back-up lists for the grouped projects in the 2027 TIP. Federal regulations allow certain project types that are exempt from transportation conformity requirements to be grouped together as a single grouped project listing, with back-up documentation detailing the individual projects included. Examples of some of the project types that can be grouped include certain transit projects, pavement resurfacing projects, safety projects, and bridge rehabilitation projects. The full list of project types eligible for grouping in the TIP are outlined in 40 CFR 93.126 and 127, Tables 2 & 3.

MTC's grouped listings are developed and maintained in accordance with the State Managed Grouped Project Listings Process, which was jointly developed by the California Federal Programming Group (CFPG), California Department of Transportation (Caltrans), Federal Highway Administration (FHWA) and Federal Transit Administration (FTA).

Online Resources

Volume II reflects the 2027 TIP as it was prepared in Summer 2026. However, because the 2027 TIP updated regularly through revisions and amendments, project information may change over time.

Current TIP information is available on MTC's TIP website (mtc.ca.gov/funding/transportation-improvement-program-tip). Additional online resources are available below.

Fund Management System

MTC manages the TIP through a web-based database known as the Fund Management System (FMS). FMS contains detailed project information for every project in the TIP, including project descriptions, schedules, funding plans, and approved revisions. Members of the public may access FMS to view the current approved version of each project in the TIP. For questions regarding specific projects, members of the public should contact the project sponsor or implementing agency directly.

Project sponsors, county transportation agencies, and federal and state partners may request an FMS account to gain additional access. FMS account holders are able to submit new projects, request project revisions, and review project history.

MTC's FMS web-based application is available online (https://fms.bayareametro.gov/login).

Grouped Listings

Grouped listings are updated frequently as projects are added, removed, or revised. The most current backup listings for grouped projects included in the 2027 TIP are available on the 2027 TIP Grouped Listings (mtc.ca.gov/funding/transportation-improvement-program/2027-tip/2027-tip-grouped-listings). Current backup listings for grouped projects may contain current and/or historical obligation funding information from prior TIP years.

Online Map and Data Dashboard

MTC provides two interactive tools that allow members of the public to explore information contained in the 2027 TIP.

The 2027 TIP Online Map (mtc.ca.gov/TIPmap) displays the geographic location of most projects in the 2027 TIP as of September 2026. Users can browse the map and click on individual projects to learn more about them. Some projects are not displayed on the map because they are not tied to a specific location. Examples of projects not reflected on the online map include transit operations, planning projects and studies, and programmatic work.

The 2027 TIP Data Dashboard (mtc.ca.gov/TIPdata) provides summary information about TIP investments as of September 2026. Users can explore investments across geographies, transportation modes, project purposes, and funding sources.

How to Read the Project Listings

Project listings provide detailed information about each project included in the 2027 TIP, including project scope, location, schedule, and funding.

Projects are organized into four sections:

- Transit projects. Projects are separated into large and small operators and then listed alphabetically by operator and TIP ID.
- Roadway projects. Projects are sorted first by county and then by general project type (state highway, local roadway, bicycle and pedestrian, port, freight and rail, and public lands and trails), and listed alphabetically by project sponsor and TIP ID.
- Regional transportation projects. Projects are sorted by county and then listed by TIP ID number.
- Tollway projects: Projects are sorted by the specific toll bridge that they affect and then by TIP ID.

Figure 1 provides an example project listing. Table 1 explains each element found within a project listing.

See the appropriate FTIP/FSTIP for current funding commitments. This listing provides the backup project information to support the lump sum amounts programmed in the FTIP.

Notes:

1) This is the FTIP lump sum “backup” list for HBP funded projects. Please see the Local Assistance web site for the most current listings:

   https://dot.ca.gov/programs/local-assistance/fed-and-state-programs/highway-bridge-program/hbp-listings

2) The purpose of this list is to show which projects being advanced by local agencies have met the eligibility requirements of the federal Highway Bridge Program and have been prioritized for funding by the Department in cooperation with local agencies for funding.

3) Contractual funding levels are determined at time of federal authorization/obligation for given phase of work. For details see Chapter 3 of the Local Assistance Procedures Manual.

4) For FTIP/FSTIP purposes, Federal Highway Bridge Program (HBP) funding constraint is managed by Caltrans.

5) Prop 1B bond funds for the Local Seismic Safety Retrofit Program (LSSRP) used for matching federal funds are also managed by Caltrans.

6) Financial constraint of LOCAL matching funds (including regional STIP funds) and LOCAL Advance Construction (AC) is the responsibility of the MPOs and their local agencies.

7) Some projects show that they are programmed using State STP funds. These funds are HBP funds transferred to the STP for bridge work that is not ordinarily eligible for HBP funds. See the HB Program Guidelines for details. Do not confuse these STP funds with Regional STP funds.

8) Corrections to this report should be addressed to the District Local Assistance Engineer:

Some agencies have contingencies unprogrammed.

(2) Santa Clara County projects are pending Santa Clara Valley Transportation Authority Board and County Board of Supervisors approval.

(3) Funds are being reserved for each PB Pilot program as listed. Specific projects will be amended and add into this Cycle 5 program, once projects have been recommended through the PB Pilot program process.

CSTIPS Module of ITIMS

CSTIP Report

The CSTIP report shows the full contents of one or more CSTIPS.
For example, if the report is requested for a particular reservation with a managing entity that also manages two other reservations, then projects for all three reservations are reported. This means that subtotal amounts are always correct, no matter what the filter might be. However, see the next remark on how to read subtotals.

The CSTIP Subtotal is the full total for values on the CSTIP.
The state subtotal is the sum of the values in the state and on the current CSTIP. This report does not show overall state totals.
The location subtotal is the sum of values for projects on a particular reservation and in a particular state. When a reservation lies in two states, project data for each part including the subtotal is presented in separate places.

Any type of CSTIP may be the subject of the report.

The adaptation planning study will contribute to advancing a climate resilient approach for Highway 1 along the eastern shoreline of Bolinas Lagoon in Marin County. The study will include a robust technical analysis of existing and anticipated climate change impacts in the location, analyze various climate change adaptation options for the transportation system, with a focus on sea level rise, shoreline modeling, sediment conveyance, and wind wave runup/hightides (and other technical areas as required by the California Coastal Commission). This corridor-level adaptation study will apply a combination of sea level rise analysis/alternatives assessment work with public engagement/outreach, implementing these two activities strategically - either independently or in tandem - at specific locations through the larger corridor-level study area. These tasks will be performed within the study area, from the US 101 bridge crossing over San Rafael Creek down to the Donahue St. on/off ramps in Marin City. Study activities will be coordinated concurrently with a TAM-led transportation infrastructure resiliency study underway.
